Scene Control Expansion Box

TR-0740C

Description

The scene control expansion box supports automatic acquisition of IP addresses, intelligent network control with small fuselage, which is convenient to carry and can be installed on the back of the door screen.

Features

* Protocol compatibility: Used with programmable central controller. It also fully supports third-party device control.
* With 1 weak current relay control interface.
* It has 1 digital I/O input and output control port with protection circuit.
* Reset button supports to restore to the factory default settings.
* With work indicator. Red indicator light indicates machine running status, and blue light indicates machine's switching status.
* Support two power supply modes, one is DC12V power supply, and the other is 100M POE power supply (standard POE protocol).
* Support DHCP, device network address automatic identification and batch IP information change.
* Network Control: Remote Control via Ethernet
* Easy to install. It can realize 360 degree installation and suspension, and can be installed vertically or horizontally.

Specifications

Model	TR-0740C
Processor	32-bit Cortex-M3 ARM architecture embedded processor
Interface	1 channel weak current relay, 1 channel I/O port
Control method	Internet
Power supply	DC12V power supply or POE power supply
Dimensions	132×83×26mm
Installation method	Vertical or horizontal installation
Power consumption	1.2W（MAX）
