

Commercial LED Video Wall

TV-BL165-YX

Feature:

- * Ultra-thin 33mm screen, ultra-narrow 6mm frame.
- * Adopt Android system. It can run WPS office software, clock, welcome interface, calendar and other downloaded applications.
- * It has a one-button switch function. And it is powered on in sections to avoid screen damage or power switch tripping due to excessive current.
- * Dual WIFI function. It simultaneously supports Wifi, Ap hotspot access and third-party equipment connection interaction. Support for different frequency band networks, multi-screen interaction and no interference with main screen networking.
- * Support synchronous and asynchronous control. Support physical buttons and wireless mouse, page turning pen, infrared remote controller and other operations.
- * Natural mute cooling. The whole machine noise is $\leq 20\text{dB}$.
- * Support U disk plug and play, and hot swap function.
- * Support image quality engine function
- * Support the live function of analog TV and network digital TV.
- * Support a variety of smart brightness adjustment methods: buttons and remote control 8-level fast adjustment, adaptive brightness adjustment, white field detection (if white field exceeds the set value, it will automatically reduces brightness)
- * Support different terminals such as PC, laptop, tablet, mobile phone for simultaneous projection, and support 4 split screens for simultaneous interactive display.
- * Mobile terminals supporting Android, IOS and MAC systems can remotely interact with each other for projection. Without screen sharing transmitter or any external equipment, the terminal supports screen picture remote sharing and split screen projection.
- * Built-in integrated 2 × 5W speakers. Support external speakers.
- * Support third-party application systems. Overall systems based on Android in-depth development are available.
- * Support smart module functions, point inspection, cable detection, voltage detection, and temperature detection.
- * Support wall-mounted installation. Come with floor stand.

Specifications:

Model	X165
Product name	Commercial LED Video Wall
Screen size	165 inches
Screen ratio	16:9
Lamp bead model	NATIONSTAR copper wire 1515
Screen resolution	1920*1080P
Net display size	W 3660mm* H2058mm
Screen size(with frame)	Width 3672 mm*Height 2189mm*Thickness 33mm
Processor and storage device	
System	Android 8.0 version, support online upgrade, support online bug fixes and new functions
CPU	1.7G 64-bit 4-core processor
GPU	MaLi T820
Storage memory	16G
Running memory	4G
Device interface	
Video interface	HDMI*3 (3 inputs), USB 3.0*1, USB 2.0*1
Audio port	Audio output interface*1
Control interface	RJ45, TOUCH-USB, WIFI, Bluetooth, infrared
Total power consumption	$\leq 4000\text{W}$ (peak), $\leq 1300\text{W}$ (average)
Total weight	180kg (screen weight) 315kg (including mobile stand)
